

## Spray Shield

- Specifically designed for personal protection
- Available with leak-detection system
- Easy to install
- Made-to-fit
- Re-usable

### **Spray Shield:**

The spray shield is specifically designed for personal protection in case of a leaking/spaying flange. Spray shields are custom made of high quality glass fabrics suited with the right coating for your application. Spray shields are easy to install, re-useable and available with a leak detection system.

### **Technical Specifications:**

Depending on the application temperature, product and environment conditions, spray shields can be fabricated of different types of glass fabrics such as: Teflon, PTFE and Silicone. Talk to one of our technical experts to find out which fabric best suits your application.
